

A BOUTIQUE DATA & BI CONSULTING PRACTICE

Turning data into decisions that drive growth.

ASANYX Analytics designs, builds and operates modern Business Intelligence and data platforms for enterprises and scale-ups. Practitioner-led, outcome-obsessed and focused on the modern Microsoft data stack.

Business Intelligence

Enterprise dashboards, semantic models and executive reporting on Power BI and Microsoft Fabric.

Data Engineering

Modern data platforms and pipelines on Azure, Fabric, Databricks, Snowflake and GCP.

Migration Services

Structured, low-risk migrations from Tableau, Qlik and Looker to Power BI and Fabric.

Consulting & Delivery

Project delivery, dedicated resources, staff augmentation and managed analytics services.

WHAT WE DO BEST

Deep, focused expertise

- Power BI, Microsoft Fabric & DAX semantic modelling
- Data engineering on Azure, Databricks, Snowflake & GCP
- Tableau · Qlik · Looker → Power BI migration
- Governed self-service and enterprise BI
- Analytics engineering, dbt & modern data stack
- Executive-grade dashboards and storytelling

WHY ASANYX

Boutique focus. Enterprise craft.

Practitioner-led

Every engagement is led by senior BI and data practitioners with enterprise delivery experience - no juniors, no hand-offs.

Outcome-obsessed

We anchor programs to measurable business outcomes - cost saved, cycle time cut, decisions made - not dashboards shipped.

Boutique speed

Small, senior teams that move fast, communicate directly and stay accountable end-to-end.

HOW WE ENGAGE

Project-based delivery

Dedicated remote resources

Managed analytics services

Consulting & advisory

OUTCOMES CLIENTS SEE

Numbers, not just dashboards

40-60% faster report load times post-migration

25-45% reduction in annual BI licensing cost

2-5x consolidation of legacy reports

90%+ business user adoption within 90 days
